

Financial Analysis Techniques: How to Find the Hidden Information in Financial Reports

12 CPD HOURS

Programme Code: P170628VIC

Overview

This interactive workshop delves into the 'hidden information' in a company's financial reports. It will focus on operating ratios and selected relational calculations based on numbers in the financial statements. The purpose is to show relationships between two variables that may not be visible in a casual reading of the financial statements but are important to assessing a company's overall financial health.

We will discuss some of the most common and useful ratios and how you can best use them to better understand the underlying strength of a company's health. This workshop will help you master the tools of finance quickly, without explaining deep details that will likely never benefit you.

Key Learning Outcome

- Find out how financial ratios can help you to pinpoint investments.
- Discover what the critical financial ratios are and how to calculate them.
- Uncover how to interpret the financial ratios to make investment decisions.
- Dig into how to measure and read how pricey the stock market is using its P-E.
- Look for buy signals from financial ratios analysis.
- Find the right price for a stock using discounted cash flow.
- Learn how to measure the 'fiscal fitness' of a company using the Altman Z-Score.

IBF-FTS Funding

This programme is recognised under the Financial Training Scheme (FTS) and is eligible for FTS claims subject to all eligibility criteria being met. For more information please visit [IBF Website](#).

Please note that in no way does this represent an endorsement of the quality of the training provider and programme. Participants are advised to assess the suitability of the programme and its relevance to participants' business activities or job roles.

The FTS is available to eligible entities based on the prevalent funding eligibility, quantum and caps. FTS claims may only be made for recognised programmes with specified validity period.
